I am very passionate about research and technology. Although I have a little experience in design and development of web-based, client-server applications with some understanding of Object-Oriented programming using, JavaScript, CSS and HTML. I hope to gain more knowledge and experience in web based development and client-server based applications.

To provide myself with the necessary experience required in the pharmacy profession while also improving various pharmaceutical skills which include customer relationship/communication skills, knowledge of drugs and learning about modern pharmaceutical developments in the pharmacy profession.
